Hackfinix 2026

POWERING THE NEXT GENERATION OF INNOVATION

THEMES AND PROBLEM STATEMENTS (HARDWARE / SOFTWARE)

- Smart Manufacturing & Industry 5.0
- Human-AI Collaboration
- Sustainability & Green Technologies
- Industrial Cybersecurity

Faculty Co-ordinators

Dr. S J Sugumar, Prof, Dept. of ECE
+91 8903618874
drsugumar.ece.nc@cambridge.edu.in

Dr. Abhilash SG, HOD, Dept. of Mech
+91 9008916991
abhilash.mech.nc@cambridge.edu.in

IEEE Co-ordinators

Dr. R Rajaramakrishna, IEEE SB Advisor
HOD. Dept. of Physics
+91 9036941887
rajaramakrishna.bs.nc@cambridge.edu.in

Ms.Pooja A, IEEE Coordinator (Hackfinix)
+91 9480994038

Student Co-ordinators

Shreya Pal (Techfinity Secretary)
+91 8257002386

Mr. Mohammed yusuf (Techfinity President)
+91 7892311408

WHY PARTICIPATE?

Join a thrilling 24-hour National Hackathon where ideas turn into Impact. Build, Innovate and Compete with the Best to create something Unforgettable.

13 - 14 MAY, 2026

Venue:- CIT-NC, Bengaluru

PRIZE FOR EACH THEME

FIRST PRIZE - ₹**40,000**

SECOND PRIZE - ₹**20,000**

SPECIAL PRIZES

BEST UI/UX AWARD
₹10,000

Incubation support of up to ₹10,00,000

For ideas that are relevant in today's landscape and demonstrate commercial viability, Incubation support of up to ₹10,00,000 will be provided after further scrutiny. Terms and Conditions Apply

For Registration and Idea Submission Scan the Above QR Code

HackfiniX

SMART MANUFACTURING & INDUSTRY 5.0

Industry Focus

Automotive, aerospace manufacturing, robotics, precision engineering.

Problem Focus

Create AI or IoT solutions for predictive maintenance, factory efficiency, and worker safety.

Expected Output

Create AI or IoT solutions for predictive maintenance, factory efficiency, and worker safety.

HUMAN-AI COLLABORATION

Industry Focus

AI, IT services, smart manufacturing, enterprise automation, healthcare AI.

Problem Focus

Build AI assistants and human-in-the-loop systems that improve productivity and decision-making.

Expected Output

Increased productivity & efficiency, improved decision-making quality, system reliability & safety, skill augmentation, scalable & adaptive project systems, explainable AI dashboard, or collaboration platform.

SUSTAINABILITY & GREEN TECHNOLOGIES

Industry Focus

Renewable energy, green manufacturing, ESG compliance.

Problem Focus

Develop solutions to monitor and reduce energy use, carbon emissions, and industrial waste.

Expected Output

Carbon tracking dashboard, sustainability analytics platform, or energy monitoring system.

INDUSTRIAL CYBERSECURITY

Industry Focus

Industrial security, cloud security, enterprise cybersecurity.

Problem Focus

Build systems to detect and prevent cyber threats in industrial networks and IoT devices.

Expected Output

Threat detection model, SOC dashboard, or cybersecurity monitoring platform.
